MANUAL PROXY CONFIGURATION

On some machines automatic detection doesn't work or is not configurable. There you can specify a manual proxy. Telephones, tablets and machines running MAC/OS are known to have troubles with automatic proxy detection.

- IP Address: 41.222.245.13
- Portnumber: 3128
- Use the proxy for all protocols
- Sometimes this information is written like : http://41.222.245.13:3128
